5 RECENZENTOVE PRIPOMBE, UTEMELJITVE | *REVIEWER'S OBSERVATIONS, ARGUMENTS*

- 1) The comparisons in the article are unclear. What data sets are being used for numerical computations? What are the effects of truncating and rounding of the orbital elements as transmitted in the navigation message of GLONASS satellites?
- 2) The index i runs from 1 to s in equation (4) and from 2 to s in equation (5)?
- 3) English is rather poor using inappropriate expressions on several occasions.
- 4) The list of references is rather unclear without any reference numbers?
