

An oscilloscope with a digital display showing a waveform. The screen displays numerical data and a grid. The device has various control knobs and buttons.

A signal generator with a digital display showing '30488'. It features several control knobs, buttons, and a red LED indicator.

A small spool of silver solder with a red label.

A small spool of silver solder with a blue label.

A pair of yellow-handled pliers.

A teal-colored pen.

A small circuit board with various electronic components, including a microcontroller and several resistors.

A small circuit board with several components, including a microcontroller and resistors.

A gold-colored rectangular component, likely a photodiode or solar cell.

A gold-colored rectangular component, likely a photodiode or solar cell.

A gold-colored rectangular component, likely a photodiode or solar cell.

A gold-colored rectangular component, likely a photodiode or solar cell.

A gold-colored rectangular component, likely a photodiode or solar cell.

A small component on a circuit board, possibly a resistor or diode.
